

Black Box Testing

Black Box Testing was conducted to evaluate CacaoDx's functional correctness based on user inputs and expected outputs, without examining the internal code or AI model implementation.

The testing focused on verifying that system modules behave as expected when Farmers, Students, and Administrators interact with the application features such as diagnosis, pest information, reminders, and system management.

<i>Regulat User</i>					
Test Case ID	Module / Function	Test Scenario	Expected Results	Pass	Remarks
MA - 001	Registration Module	Verify user role selection (Student/Farmer) Test Steps: 1. Open the registration screen 2. Locate the role selection field 3. Select Student or Farmer 4. Verify the role is selectable	User selects a role	☐	
		Verify user can access registration screen Test Steps: 1. Open the app 2. Navigate to the registration screen 3. Verify the registration form is displayed with all required fields	Registration form is displayed with the required fields	☐	
		Verify registration using invalid	System displays an	☐	

		credentials Test Steps: 1. Open the registration screen 2. Enter invalid or incomplete details 3. Tap Register 4. Verify system displays an error message	error message		
MA - 002	Login & Authentication	Verify login using valid credentials Test Steps: 1. Open the app 2. Enter valid username and password 3. Tap Login 4. Verify user is redirected to the Home Dashboard	User is authenticated and redirected to the Home Dashboard	☐	
		Verify login using invalid credentials Test Steps: 1. Open the app 2. Enter invalid username or password 3. Tap Login 4. Verify system displays an error message	System displays an error message	☐	
		Verify logout functionality Test Steps: 1. Log in with valid credentials 2. Tap Logout 3. Verify user session ends and login screen is displayed	User session ends and login screen is displayed	☐	
		User clicks browser	Session	☐	

		back button after logout Test Steps: 1. Log in with valid credentials 2. Tap Logout 3. Press the device back button 4. Verify session remains terminated and login page is displayed	remains terminated. Login page is displayed.		
MA-003	Home / Dashboard Display	Review access to dashboard after login Test Steps: 1. Log in with valid credentials 2. Observe the Home Dashboard 3. Verify it loads without errors	Dashboard loads successfully without errors	☐	
		View user location Test Steps: 1. Log in and open the Home Dashboard 2. Locate the map or location display 3. Verify the user's real-time location is shown correctly	User's real-time location is displayed correctly	☐	
		View system statistics Test Steps: 1. Log in and open the Home Dashboard 2. Locate the statistics section 3. Verify system statistics are visible	View system statistics	☐	
		Access available features Test Steps: 1. Log in and open the	Feature buttons are visible and functional	☐	

		Home Dashboard 2. Locate all feature buttons 3. Tap each button 4. Verify each feature is accessible and functional			
MA-004	Pest & Disease Information	View list of pests and diseases Test Steps: 1. Navigate to the Pest & Disease Information module 2. Verify a list of pests and diseases is displayed	List of pests and diseases is displayed	☐	
		View pest/disease details Test Steps: 1. Navigate to the Pest & Disease Information module 2. Tap on a specific pest or disease entry 3. Verify detailed description and information are shown	Detailed descriptions and information are shown correctly	☐	
MA-005	Diagnosis Module	Capture image using camera Test Steps: 1. Navigate to the Diagnosis Module 2. Select the camera option 3. Verify the camera opens 4. Capture an image and verify it is accepted	Camera opens and allows image capture	☐	
		Select a farm to associate the cacao	Dropdown selection of	☐	

		pod	farms across Negros Oriental		
		Upload image from device gallery Test Steps: 1. Navigate to the Diagnosis Module 2. Select the gallery/upload option 3. Choose an image from the device 4. Verify the image is successfully uploaded	Selected image is successfully uploaded	☐	
		Select focus area for scanning Test Steps: 1. Upload or capture an image 2. Use the crop/focus tool to select the area of interest 3. Verify the focus crop appears correctly	Focus crop appears for image selection	☐	
		Process diagnosis Test Steps: 1. Upload or capture a valid cacao image 2. Select focus area 3. Tap Diagnose 4. Verify the system analyzes and processes the image	System analyzes image and processes diagnosis	☐	
		Upload non-cacao image Test Steps: 1. Navigate to the Diagnosis Module 2. Upload an image that is not a cacao plant	Error or low-confidence result	☐	

		3. Tap Diagnose 4. Verify an error or low-confidence result is returned			
		Upload blurry image Test Steps: 1. Navigate to the Diagnosis Module 2. Upload a blurry or unclear image 3. Tap Diagnose 4. Verify an error or low-confidence result is returned	Error or low-confidence result	☐	
		View diagnostic result Test Steps: 1. Complete a diagnosis 2. Navigate to or wait for the result screen 3. Verify the diagnostic image is displayed	Diagnostic image is displayed	☐	
		View confidence score Test Steps: 1. Complete a diagnosis 2. View the result screen 3. Locate the confidence score 4. Verify it is shown accurately	Confidence score is shown accurately	☐	
		View causes and treatments Test Steps: 1. Complete a diagnosis 2. View the result screen 3. Locate the causes, treatments,	Causes, treatments, prevention, and actions required are displayed	☐	

		prevention, and actions sections 4. Verify all information is displayed			
MA-006	History Feature	Access diagnosis history Test Steps: 1. Navigate to the History section 2. Verify previously scanned records are listed	Previously scanned records are displayed	☐	
		View detailed history record Test Steps: 1. Navigate to the History section 2. Tap on a specific record 3. Verify the full details of the selected record are shown	Selected record opens with full details	☐	
MA-007	Reminders	View calendar reminders Test Steps: 1. Navigate to the Reminders module 2. Open the calendar view 3. Verify reminders are highlighted on the calendar	Reminders are highlighted on the calendar	☐	
		Add and complete tasks Test Steps: 1. Navigate to the Reminders module 2. Add a new task with valid details 3. Save the task 4. Mark the task as	Tasks can be added and marked as completed	☐	

		completed 5. Verify the task status updates			
		Add task with empty input Test Steps: 1. Navigate to the Reminders module 2. Attempt to add a task with no input 3. Tap Save 4. Verify an error message is displayed	Error message	☐	
		Add task with past date Test Steps: 1. Navigate to the Reminders module 2. Attempt to add a task with a date in the past 3. Tap Save 4. Verify a warning or restriction is applied	Warning or restriction	☐	
MA-008	Profile & Settings	Access user profile Test Steps: 1. Navigate to the Profile section 2. Verify user profile details are displayed	Profile details are displayed	☐	
		Edit profile (Guest) Test Steps: 1. Navigate to the Profile section 2. Tap Edit 3. Modify profile fields 4. Save the changes 5. Verify changes are saved	Changes saved	☐	

MA-009	Security	Access account security Test Steps: 1. Navigate to Security settings 2. Verify security status and options are shown	Security status and options are shown	☐	
		Access saved reports Test Steps: 1. Navigate to Security or Reports section 2. Verify the saved reports list opens successfully	Saved reports list opens successfully	☐	
		Update user password Test Steps: 1. Navigate to Security settings 2. Locate the change password option 3. Enter current and new password 4. Save changes 5. Verify the password is updated successfully	User can update their password successfully	☐	
MA-010	Feedback	Submit feedback Test Steps: 1. Navigate to the Feedback module 2. Select a star rating from 1 to 5 3. Enter feedback text 4. Tap Submit 5. Verify feedback is submitted successfully	User can rate (1–5 stars) and submit feedback	☐	
	Test executed by:			Test Executed Date:	

Use Case Number : 002***Admin User***

Test Case ID	Test Category	Test Case	Expected Results	Pass	Remarks
A-001	Registration Module	Verify user can access registration screen Test Steps: 1. Open a web browser and navigate to the CacaoDx registration URL 2. Verify the registration form is displayed with all required fields	Registration form is displayed with the required fields	☐	
		Verify registration using invalid credentials Test Steps: 1. Open the registration page 2. Enter invalid or incomplete details 3. Click Register 4. Verify system displays an error message	System displays an error message	☐	
		Verify user role selection (Student/Farmer/Admin) Test Steps: 1. Open the registration page 2. Locate the role selection field 3. Verify Student, Farmer, and Admin roles are available 4. Select Admin	User select role	☐	

		5. Verify the role is selectable			
		Verify login using valid credentials Test Steps: 1. Open the login page 2. Enter valid admin credentials 3. Click Login 4. Verify user is authenticated and redirected to the Home Dashboard	User is authenticated and redirected to the Home Dashboard	☐	
A-002	Login & Authentication	Admin logs in using valid credentials Test Steps: 1. Open the login page 2. Enter valid admin username and password 3. Click Login 4. Verify admin is redirected to the Admin Dashboard	Admin is redirected to the Admin Dashboard	☐	
		Admin logs out Test Steps: 1. Log in as admin 2. Click Logout 3. Verify session ends and login page is displayed	Session ends and login page is displayed	☐	
		Admin clicks browser back button after logout Test Steps: 1. Log in as admin 2. Click Logout 3. Press the browser back button 4. Verify session remains terminated and login page is displayed	Session remains terminated . Login page is displayed.	☐	
A-003	Dashboard	Admin Dashboard access Test Steps: 1. Log in as admin	Dashboard loads showing	☐	

		2. Observe the Admin Dashboard 3. Verify it loads showing system overview	system overview		
		View map with farm data Test Steps: 1. Log in as admin 2. Open the Dashboard 3. Locate the map section 4. Verify farm locations are displayed on the map	Map displays farms	☐	
		View map with farm data Test Steps: 1. Log in as admin 2. Open the Dashboard 3. Locate the map section 4. Verify farm locations are displayed on the map	Correct color displayed	☐	
		Hover on farm Test Steps: 1. Log in as admin 2. Open the Dashboard map 3. Hover the cursor over a farm marker 4. Verify farm details are displayed in a tooltip or popup	Farm details displayed	☐	
A-004	User Records Management	Access User Records Test Steps: 1. Log in as admin 2. Navigate to User Records 3. Verify the list of user records is displayed	Admin can view user records	☐	
		Add new user record Test Steps: 1. Navigate to User Records 2. Click Add New User	User record is saved successfully	☐	

		3. Enter valid user details 4. Save the record 5. Verify the new user record appears in the list			
		Delete user record (own account) Test Steps: 1. Navigate to User Records 2. Locate the admin's own account 3. Click Delete 4. Confirm deletion 5. Verify the account is deleted	Admin can delete its own account	☐	
		Delete other user records Test Steps: 1. Navigate to User Records 2. Locate another user's record 3. Click Delete 4. Confirm deletion 5. Verify the record is removed and changes are reflected immediately	Admin can delete other user's records; Changes are reflected immediately	☐	
A-005	Pest Records Management	Access Pest Records Test Steps: 1. Navigate to Pest Records 2. Verify the list of pest records is displayed	Pest details are saved successfully	☐	
		Verify auto-increment for Plant ID Test Steps: 1. Navigate to Pest Records 2. Click Add New Pest 3. Observe the Plant ID field 4. Verify it auto-increments from the last entry	Verify auto-increment for Plant ID when adding new pest	☐	
		Edit existing pest details Test Steps:	Pest informatio	☐	

		1. Navigate to Pest Records 2. Select an existing pest record 3. Click Edit 4. Modify the details 5. Save changes 6. Verify the pest information is updated	n is uploaded successfully		
		Delete pest record Test Steps: 1. Navigate to Pest Records 2. Select a pest record 3. Click Delete 4. Confirm deletion 5. Verify the record is removed from the database	Record is removed from the database successfully	☐	
A-006	Disease Records Management	Access Disease Records Test Steps: 1. Navigate to Disease Records 2. Verify the Disease Records page opens	Disease Records page opens	☐	
		Add, edit, or update disease details Test Steps: 1. Navigate to Disease Records 2. Click Add or select an existing record to edit 3. Enter or update disease information 4. Save changes 5. Verify the information is updated	Disease information is updated successfully	☐	
		Edit existing disease information Test Steps: 1. Navigate to Disease Records 2. Select an existing disease record 3. Click Edit	Admin can edit and update existing disease information.	☐	

		4. Modify the details 5. Save changes 6. Verify the disease information is updated			
		Delete disease records Test Steps: 1. Navigate to Disease Records 2. Select a disease record 3. Click Delete 4. Confirm deletion 5. Verify the record is removed	Admin can delete disease records	☐	
A-007	Audit Logs	Access audit logs Test Steps: 1. Navigate to Audit Logs 2. Verify the list of recorded system actions is displayed	System displays recorded actions	☐	
		Filter logs by activity type Test Steps: 1. Navigate to Audit Logs 2. Use the filter option to filter by activity type or diagnosis ID 3. Verify the filtered results are displayed correctly	Admin can filter by diagnosis ID	☐	
		Search audit logs Test Steps: 1. Navigate to Audit Logs 2. Use the search bar to search by user, date, or action 3. Verify matching results are displayed	Admin can search logs by user, date or action	☐	
A-008	Settings	Access system settings Test Steps: 1. Navigate to Settings 2. Verify system preferences and security settings are accessible	Admin can modify system preferences and security settings	☐	

		Update personal information Test Steps: 1. Navigate to Settings 2. Locate the personal information section 3. Update the admin profile details 4. Save changes 5. Verify changes are saved	Changes to admin profile is saved	☐	
		Update password Test Steps: 1. Navigate to Settings 2. Locate the change password section 3. Enter current and new password 4. Save changes 5. Verify password is updated successfully	Admin can change password successfully	☐	
		Save settings changes Test Steps: 1. Navigate to Settings 2. Modify any setting 3. Click Save 4. Verify settings are persisted and page redirects properly	Settings are persisted and page redirect properly after saved	☐	
A-009	Uploads Module	Upload training data/images Test Steps: 1. Navigate to the Uploads Module 2. Click Upload 3. Select training images from the device 4. Confirm the upload 5. Verify datasets are uploaded successfully	Admin can upload new datasets for ML training	☐	
		View all uploaded datasets Test Steps: 1. Navigate to the Uploads	All recently uploaded	☐	

		Module 2. Verify all recently uploaded datasets are displayed in the list	datasets are displayed in optimized view		
		Handle large number of images Test Steps: 1. Navigate to the Uploads Module 2. Upload or observe a large batch of images 3. Verify the system handles them with proper paging	System handles multiple images with proper paging	☐	
		Enforce image upload limit Test Steps: 1. Navigate to the Uploads Module 2. Attempt to upload images beyond the set limit 3. Verify the system prevents the upload and shows an appropriate message	System prevents uploading beyond set limit	☐	
		Delete misadded images Test Steps: 1. Navigate to the Uploads Module 2. Locate an incorrectly uploaded image 3. Click Delete 4. Verify the image is removed	Admin can remove incorrectly uploaded images	☐	
		View dataset efficiency metrics Test Steps: 1. Navigate to the Uploads Module 2. Locate the metrics/analytics section	Module show dataset quality and ML performance metrics	☐	

		3. Verify dataset quality and ML performance metrics are displayed			
A-010	Diagnosis Module	Search diagnosis records by user or disease name Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Search bar 3. Enter a user name or disease name 4. Verify the table filters to matching records	Records matching the search term are displayed	☐	
		Filter diagnosis records by disease type Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Disease filter dropdown 3. Select a specific disease type 4. Verify the table displays only records for that disease	Only records for the selected disease type are shown	☐	
		Filter diagnosis records by confidence level Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Confidence filter 3. Set a confidence threshold 4. Verify the table updates to show only records meeting the confidence criteria	Records are filtered by the specified confidence level	☐	
		Filter diagnosis records by date range Test Steps: 1. Navigate to the	Diagnosis records within the selected	☐	

		Diagnosis Records page 2. Locate the From and To date fields 3. Set a date range 4. Click Apply 5. Verify only records within the date range are displayed	date range are displayed		
		Reset all diagnosis record filters Test Steps: 1. Navigate to the Diagnosis Records page 2. Apply one or more filters 3. Click the Reset button 4. Verify all filters are cleared and full record list is restored	All filters are cleared and full diagnosis record list is restored	☐	
		Toggle between grid and list view Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the view toggle icons 3. Switch between grid and list views 4. Verify the records display changes accordingly	Records display toggles between grid and list view correctly	☐	
		Paginate through diagnosis records Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Prev and Next pagination controls 3. Click Next to advance pages 4. Verify the next set of	Pagination navigates correctly through all diagnosis records	☐	

		records is displayed 5. Click Prev to go back			
A-011	Disease Management	View list of diseases Test Steps: 1. Navigate to the Disease Management page 2. Verify the disease list table is displayed 3. Confirm columns: Name, Type, Cause, Plant Part, and Actions are visible	Disease list table is displayed with all required columns	☐	
		View disease details Test Steps: 1. Navigate to the Disease Management page 2. Locate a disease entry in the table 3. Click the View (eye) icon for that disease 4. Verify the full details of the disease are displayed	Full details of the selected disease are displayed	☐	
		Verify disease type classifications are displayed Test Steps: 1. Navigate to the Disease Management page 2. Review the Type column in the disease list 3. Verify diseases are classified as Fungal, Insect-related, Normal, or Unclassified	Disease types are correctly categorized and displayed	☐	
A-012	Reports	View reports summary cards Test Steps: 1. Navigate to the Reports page 2. Verify the summary cards are displayed 3. Confirm Total Scans,	Reports summary cards display correct data	☐	

		Diseases Detected, Affected Areas, and Most Common disease are shown			
		Filter reports by date range Test Steps: 1. Navigate to the Reports page 2. Set the From and To date fields to define a reporting period 3. Click Apply 4. Verify the report data updates for the selected range	Report data updates to reflect the selected date range	☐	
		Reset reports date filter Test Steps: 1. Navigate to the Reports page 2. Apply a date range filter 3. Click the Reset button 4. Verify the report returns to its default date range and data	Reports reset to the default date range and data	☐	
		View most common diseases ranked list Test Steps: 1. Navigate to the Reports page 2. Locate the Most Common Diseases section 3. Verify a ranked list of diseases is displayed with trophy icons for the top three 4. Confirm each entry includes a proportional bar and scientific name	Ranked disease list is displayed with trophy icons, scientific names, and proportional bars	☐	
		View areas with highest case count Test Steps: 1. Navigate to the Reports	Ranked list of areas with highest		

		page 2. Locate the Areas with Highest Case Count section 3. Verify a ranked list of barangays or towns with the most diagnoses is displayed	case counts is displayed		
		Export report to Excel Test Steps: 1. Navigate to the Reports page 2. Set a desired date range and click Apply 3. Click the Export to Excel button 4. Verify the report data is downloaded as a spreadsheet file	Report data is exported and downloaded as an Excel spreadsheet		
A-013	Feedback	Access user feedback Test Steps: 1. Navigate to the Feedback module 2. Verify all submitted user feedbacks are displayed	Admin can view all submitted feedbacks	☐	
		Sort feedback by date, rating, user Test Steps: 1. Navigate to the Feedback module 2. Use the sort options to sort by date, rating, or user 3. Verify the feedback list updates accordingly	Feedback can be sorted by various criteria	☐	
		Search feedback by keyword Test Steps: 1. Navigate to the Feedback module 2. Enter a keyword in the search bar 3. Verify matching feedback entries are	Admin can search through feedback entries	☐	

Use Case Number : 002
Regular / Farmer / Student User (Web Application)

Test Case ID	Test Category	Test Case	Expected Results	Pass	Remarks
RF-001	Registration Module	Verify user can access registration screen Test Steps: 1. Open a web browser and navigate to the CacaoDx registration URL 2. Verify the registration form is displayed with all required fields	Registration form is displayed with the required fields	☐	
		Verify registration using invalid credentials Test Steps: 1. Open the registration page 2. Enter invalid or incomplete details 3. Click Register 4. Verify system displays an error message	System displays an error message	☐	
		Verify user role selection (Student/Farmer/Admin) Test Steps: 1. Open the registration page 2. Locate the role selection field 3. Verify Student, Farmer, and Admin roles are available	User select role	☐	

		4. Select Admin 5. Verify the role is selectable			
RF-002	Login & Authentication	Verify login using valid credentials Test Steps: 1. Open the login page 2. Enter valid admin credentials 3. Click Login 4. Verify user is authenticated and redirected to the Home Dashboard	User is authenticated and redirected to the Home Dashboard	☐	
		Verify login using invalid credentials Test Steps: 1. Open the login page 2. Enter invalid username or password 3. Click Login 4. Verify system displays an error message	System displays an error message	☐	
		Verify logout functionality Test Steps: 1. Log in with valid credentials 2. Click Logout 3. Verify session ends and login screen is displayed	User session ends and login screen is displayed	☐	
		Admin clicks browser back button after logout Test Steps: 1. Log in as admin 2. Click Logout 3. Press the browser back button 4. Verify session remains terminated and login page is displayed	Session remains terminated . Login page is displayed.	☐	
RF-003	Dashboard	Review access to dashboard after login	Dashboard loads	☐	

		Test Steps: 1. Log in with valid credentials 2. Observe the Home Dashboard 3. Verify it loads without errors	successfully without errors		
		View map with farm data Test Steps: 1. Log in as admin 2. Open the Dashboard 3. Locate the map section 4. Verify farm locations are displayed on the map	Map displays farms	☐	
		View map with farm data Test Steps: 1. Log in as admin 2. Open the Dashboard 3. Locate the map section 4. Verify farm locations are displayed on the map	Correct color displayed	☐	
		Hover on farm Test Steps: 1. Log in as admin 2. Open the Dashboard map 3. Hover the cursor over a farm marker 4. Verify farm details are displayed in a tooltip or popup	Farm details displayed	☐	
RF-004	Diagnosis Module	Search diagnosis records by user or disease name Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Search bar 3. Enter a user name or disease name 4. Verify the table filters to matching records	Records matching the search term are displayed	☐	

		Filter diagnosis records by disease type Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Disease filter dropdown 3. Select a specific disease type 4. Verify the table displays only records for that disease	Only records for the selected disease type are shown	☐	
		Filter diagnosis records by confidence level Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Confidence filter 3. Set a confidence threshold 4. Verify the table updates to show only records meeting the confidence criteria	Records are filtered by the specified confidence level	☐	
		Filter diagnosis records by date range Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the From and To date fields 3. Set a date range 4. Click Apply 5. Verify only records within the date range are displayed	Diagnosis records within the selected date range are displayed	☐	
		Reset all diagnosis record filters Test Steps: 1. Navigate to the Diagnosis Records page 2. Apply one or more	All filters are cleared and full diagnosis record list is restored		

		filters 3. Click the Reset button 4. Verify all filters are cleared and full record list is restored			
		Toggle between grid and list view Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the view toggle icons 3. Switch between grid and list views 4. Verify the records display changes accordingly	Records display toggles between grid and list view correctly		
		Paginate through diagnosis records Test Steps: 1. Navigate to the Diagnosis Records page 2. Locate the Prev and Next pagination controls 3. Click Next to advance pages 4. Verify the next set of records is displayed 5. Click Prev to go back	Pagination navigates correctly through all diagnosis records		
RF-005	Disease Management	View list of diseases Test Steps: 1. Navigate to the Disease Management page 2. Verify the disease list table is displayed 3. Confirm columns: Name, Type, Cause, Plant Part, and Actions are visible	Disease list table is displayed with all required columns	☐	
		View disease details	Full details	☐	

		Test Steps: 1. Navigate to the Disease Management page 2. Locate a disease entry in the table 3. Click the View (eye) icon for that disease 4. Verify the full details of the disease are displayed	of the selected disease are displayed		
		Verify disease type classifications are displayed Test Steps: 1. Navigate to the Disease Management page 2. Review the Type column in the disease list 3. Verify diseases are classified as Fungal, Insect-related, Normal, or Unclassified	Disease types are correctly categorized and displayed	☐	
RF-006	Reports	View reports summary cards Test Steps: 1. Navigate to the Reports page 2. Verify the summary cards are displayed 3. Confirm Total Scans, Diseases Detected, Affected Areas, and Most Common disease are shown	Reports summary cards display correct data	☐	
		Filter reports by date range Test Steps: 1. Navigate to the Reports page 2. Set the From and To date fields to define a reporting period 3. Click Apply 4. Verify the report data updates for the selected	Report data updates to reflect the selected date range	☐	

		range			
		Reset reports date filter Test Steps: 1. Navigate to the Reports page 2. Apply a date range filter 3. Click the Reset button 4. Verify the report returns to its default date range and data	Reports reset to the default date range and data	☐	
		View most common diseases ranked list Test Steps: 1. Navigate to the Reports page 2. Locate the Most Common Diseases section 3. Verify a ranked list of diseases is displayed with trophy icons for the top three 4. Confirm each entry includes a proportional bar and scientific name	Ranked disease list is displayed with trophy icons, scientific names, and proportional bars	☐	
		View areas with highest case count Test Steps: 1. Navigate to the Reports page 2. Locate the Areas with Highest Case Count section 3. Verify a ranked list of barangays or towns with the most diagnoses is displayed	Ranked list of areas with highest case counts is displayed		
		Export report to Excel Test Steps: 1. Navigate to the Reports page 2. Set a desired date range and click Apply 3. Click the Export to	Report data is exported and downloaded as an Excel		

		Excel button 4. Verify the report data is downloaded as a spreadsheet file	spreadsheet		
RF-007	Feedback	View overall average rating Test Steps: 1. Navigate to the Feedback page 2. Locate the Rating Overview panel 3. Verify the overall average rating (out of 5), total review count, and star distribution bars are displayed	Overall average rating, total review count, and distribution bars are displayed	☐	
		Filter feedback by star rating Test Steps: 1. Navigate to the Feedback page 2. Locate the Rating filter 3. Select a specific star level (e.g., 4 stars) 4. Verify only feedback entries with that rating are displayed	Only feedback entries with the selected star rating are displayed	☐	
		Sort feedback by newest and oldest Test Steps: 1. Navigate to the Feedback page 2. Locate the sort options 3. Select Newest 4. Verify feedback is sorted from most recent to oldest 5. Select Oldest and verify the order is reversed	Feedback list is sorted correctly by date in both directions	☐	
		Sort feedback by highest and lowest rating Test Steps: 1. Navigate to the Feedback page	Feedback list is sorted correctly by rating		

		2. Locate the sort options 3. Select Highest 4. Verify feedback is sorted from highest to lowest rating 5. Select Lowest and verify the order is reversed	in both directions		
		Search feedback by user name or comment Test Steps: 1. Navigate to the Feedback page 2. Enter a user name or keyword in the search bar 3. Verify matching feedback entries are displayed	Feedback entries matching the search term are displayed

Sample Black Box Testing Table

Online Food Ordering System

Project Information

Field	Details
Project Name	Online Food Ordering System
Testing Type	Black Box Testing
Prepared By	QA Tester
Test Environment	Web Browser / Mobile Browser
Date Tested	May 7, 2026

A. Guest/User Module Black Box Testing

Test Case ID	Module/Function	Test Scenario	Test Steps	Test Data	Expected Result	Actual Result	Status
--------------	-----------------	---------------	------------	-----------	-----------------	---------------	--------

G-001	User Registration	Register with valid information	1. Open registration page 2. Enter valid details 3. Click Register	Valid name, email, password	User account is successfully created
G-002	User Registration	Register using existing email	1. Enter registered email 2. Submit form	Existing email	System displays "Email already exists" message
G-003	Login	Login with correct credentials	1. Enter valid username and password 2. Click Login	Valid credentials	User is redirected to dashboard/homepage
G-004	Login	Login with invalid password	1. Enter valid username and wrong password 2. Click Login	Incorrect password	System displays invalid login message
G-005	Forgot Password	Reset password using registered email	1. Click Forgot Password 2. Enter registered email	Registered email	Password reset link/code is sent

G-006	Browse Menu	View available food items	1. Open menu page	N/A	Food items are displayed correctly
G-007	Search Food	Search existing food item	1. Enter keyword in search box	"Burger"	Matching food items are displayed
G-008	Add to Cart	Add item to cart	1. Select food item 2. Click Add to Cart	Pizza x1	Item is added to shopping cart
G-009	Update Cart Quantity	Increase item quantity	1. Open cart 2. Change quantity	Qty = 3	Cart total updates correctly
G-010	Remove from Cart	Remove item from cart	1. Click remove button	Existing cart item	Selected item is removed from cart
G-011	Checkout	Checkout with complete information	1. Fill delivery details 2. Confirm order	Valid address/payment	Order is successfully placed
G-012	Checkout	Checkout with missing address	1. Leave address blank 2. Submit order	Blank address	System prompts required field validation

G-0 13	Payment	Pay using valid payment details	1. Enter payment info 2. Confirm payment	Valid payment info	Payment is processed successfully
G-0 14	Order Tracking	View order status	1. Open order history	Existing order	Current order status is displayed
G-0 15	Logout	Logout from system	1. Click Logout	N/A	User session ends successfully

B. Admin Module Black Box Testing

Test Case ID	Module/Function	Test Scenario	Test Steps	Test Data	Expected Result	Actual Result	Status
A-001	Admin Login	Login with valid admin credentials	1. Enter admin username/password 2. Click Login	Valid admin account	Admin dashboard is displayed		
A-002	Admin Login	Login with invalid credentials	1. Enter incorrect credentials	Invalid username/password	Error message is displayed		
A-003	Food Management	Add new food item	1. Click Add Food 2. Enter details 3. Save	Burger, ₱120	Food item is added successfully		
A-004	Food Management	Add food item with missing name	1. Leave food name blank 2. Save	Blank food name	Validation message is displayed		
A-005	Food Management	Update food price	1. Edit food item 2. Change price	₱150	Food details are updated		
A-006	Food Management	Delete food item	1. Select food item 2. Click Delete	Existing item	Food item is removed from menu		

A-007	Category Management	Add food category	1. Enter category name 2. Save	"Desserts"	Category is successfully added
